

for an excellent finish

Discs, Fastlock: CERAMIT CR 456 fibre-Procut

High-performance ceramic grain disc on fiber backing with Fastlock system

Product benefits

- High productivity and economic efficiency
- Hard and sharp ceramic abrasive grit ensures high stock removal rates and long tool life
- Low grinding temperatures and longer tool life due to additional Procut coating
- Very high edge stability due to fiber backing

Applications

General:

- Punctual processing of a wide variety of metal surfaces in hard-to-reach areas

Automotive body shop:

- Defect grinding with Fastlock discs on angle grinders

Product design

Type:	CERAMIT CR 456 fibre-Procut
Grain:	Ceramic core
Bonding:	Synthetic resin, with active ingredient coating
Backing:	Vulcanized fiber
Coating:	Closed
Grit range:	+ 36/50/60/80/100/120
