

for an excellent finish

Discs: MultiNet MN 921, velour-backed

Open abrasive net discs for universal applications with dust-free work in paint shops

Product benefits

- Full-surface dust extraction through MultiNet mesh structure extends the service life of the abrasive tool
- Dust-free sanding ensures optimum working conditions in the paint booths and surrounding work areas
- The dust-free and always visible workpiece surface enables a fast and exact control of the working result
- Easy disc change as no hole pattern is to be observed
- High edge stability
- All-purpose – please contact us for details!

Applications

Automotive body shop:

- Defect highlighting with discs on a handpad
