

CERAMIT® CN 416 Z OP

High-performance sanding belts with openly coated ceramic grain for maximum stock removal on wood and wood-based materials

Your advantages

- Up to 50% longer service life compared to similar products due to sharp ceramic grain
- Reduced clogging in applications with high stock removal rates and when sanding wood-based materials subject to clogging
- Consistently high stock removal rate until the end of the service life, even with special challenges such as hard inclusions in the material
- No belt breakage at maximum loads thanks to the use of a highly tear-resistant polyester backing
- Available as narrow and wide belts for perfect results on all sanding machines for sanding wood, MDF, HDF, chipboard, hardwood floors, and other materials

Grain	CERAMIT® high-performance ceramic grain and aluminium oxide
Coating	Open
Backing	Heavy, rigid, particularly tear-resistant backing made of polyester fabric
Grit range	+ 24 / + 36 / +40 / +50 / +60 / +80 / +100 / +120
Delivery forms	Narrow and wide belts (inkl. segmented wide belts)
