

MULTIFLOW PAD

Hermes backing pad adapter for MULTIHOLE or conventional discs

The benefits for you

- **Full-surface dust extraction** by open 2-channel construction
- **Universally applicable** on every backing pad with dust extraction system (eg. 6-hole system or 9-hole-system)
- **Faster disc changes**, as no congruent positioning of the hole systems of the disc and backing pad is required
- **Longer service life** of velcro backing pad due to additional backing pad protection
- **Maximum efficient grinding** with combination of MULTIHOLE discs and MULTIFLOW pads

MULTIFLOW PAD
